

**Questions to ask when choosing a:
PRIMARY CARE PHYSICIAN (PCP)**

For Individuals with Traumatic Brain Injury (TBI)

Developed through a collaboration of the Brain Injury Associations of Florida, Montana, and New Jersey.

When choosing a primary care physician to fit the needs of an individual who has sustained a traumatic brain injury, knowing what to ask can help you make the best possible selection. The checklist below is a good place to start. Check each box that can be answered with a "yes." The primary care physician who receives the most checkmarks is likely to be the best choice for your loved one. This can be a very important, long-term relationship. Take your time in choosing. Learn the location of the office and office hours to be sure they are convenient for you. Talk to the support staff. Are they courteous, organized and helpful? Will the doctor take time to listen to you? Do you feel comfortable with him/her? Ask friends and relatives for referrals.
